Platforms & Protocols

- Apple Home & Siri for compatible devices
- Matter & Zigbee through M6
- Tuya / Smart Life for Tuya devices
- Aqara Home for Aqara devices

Important Compatibility Note

- Not every device in the package is necessarily exposed natively in Apple Home.
- Some devices rely on a compatible hub/bridge or their native app.
- Final compatibility is reviewed during design and commissioning.

Technical Specifications - Control & Lighting

1. Zemismart M6 Matter Zigbee Hub

Qty: 2

Main Matter + Zigbee bridge for compatible smart-home devices and automations across the villa.

Protocols	Tuya Zigbee Standard + Matter	Capacity	Up to 125-128 sub-devices
Platforms	Tuya / Smart Life / Apple HomeKit / Google Home / SmartThings	Network	LAN RJ45 + local home network

Installation Notes

- Confirm neutral wire availability and back-box dimensions before AVATTO switch installation.
- Place M6 hubs and IR controllers according to villa size and device locations for stable coverage.
- Check Aqara A100 compatibility with door type, thickness and opening direction before installation.
- Install the gas detector and valve according to site safety requirements and actual gas-line location.

Compatibility Notes

- Siri and Apple Home exposure depends on the device, available integration and final configuration.
- Some functions may remain in Tuya/Smart Life or Aqara Home rather than Apple Home.
- Prices, stock and specifications can change; confirm on Aura.eg before final quotation approval.
