13 Devices

Complete apartment solution

EGP 62,999

Package price

Zigbee + Matter

Tuya • Alexa • Aqara

ONE PACKAGE. ONE SMARTER APARTMENT.

Why this package?

More everyday comfort

Control lighting and compatible devices by voice or phone and trigger daily scenes with one command.

Smart access & security

Aqara A100 adds fingerprint, PIN, NFC and app access with flexible user management.

Control traditional appliances

Bring ACs, TVs and other compatible IR appliances into smart scenes using the Zemismart Zigbee IR bridge.

Expandable ecosystem

The M6 hub combines Zigbee and Matter support and lets the system grow with more compatible devices later.

Ready Smart Scenarios for the Apartment

Arrival Scenario

Unlock the door, turn on entry lighting and prepare the AC according to the selected scene.

Movie Scenario

Turn on the TV and AC through the IR bridge and set AVATTO lighting with one scene.

Gas Safety Scenario

When gas is detected, the sensor sounds an alarm and sends an alert; the compatible valve can be included in a programmed shut-off automation.

Away Scenario

Turn off selected lights and appliances, review the lock and camera status, and activate an away security scene.

Important before ordering & installation

- AVATTO switches require a neutral wire; check circuit count and wall-box dimensions before installation.
- The IR bridge needs continuous USB power and suitable placement for infrared line-of-sight.
- Aqara A100 compatibility depends on the door type, thickness, opening direction and existing lock hardware.
- The gas detector and valve should be installed according to safety requirements and the actual valve location.
- Some Apple Home, Alexa and Google Home functions depend on device compatibility and platform setup.

Smart Apartment Package - EGP 62,999

Contact Aura Smart Home to review compatibility, select device colors and confirm installation requirements before execution.
