Avera 4Gang x6

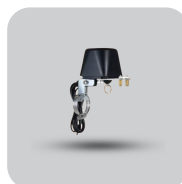

IR Remote

Gas Sensor

Smart Valve

Levana i7 Lock

12 Devices

Complete apartment solution

EGP 30,000

Package price

Zigbee + Wi-Fi

Tuya Smart + Alexa

Why This Package?

Greater Everyday Comfort

Control lighting and devices by voice or phone, and run daily scenes with a single command.

Smart Security & Access

Levana i7 with fingerprint, PIN, card and app access, plus entry logs and user management.

Control Traditional Appliances

Add the AC, TV and receiver to smart scenes through the Zigbee IR remote.

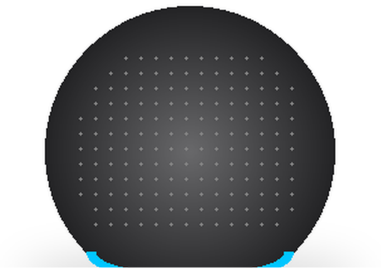

Expandable Ecosystem

A Zigbee gateway connects switches, sensors and the valve, and lets you add more devices later.

Ready Smart Automation Scenarios

SMART AUTOMATION SCENARIOS

Arrival Scenario

Unlock the door, turn on the entrance lighting, and prepare the AC according to the selected scene.

Cinema Scenario

Turn on the TV and AC with the IR Remote and adjust Avera lighting with one scene.

Gas Safety Scenario

When a gas leak is detected, the sensor sounds an alarm, sends a notification, and the valve can be linked to an automatic shut-off scenario.

Leaving Scenario

Turn off lights and devices, check the door status, and activate a quick safety scene before leaving.

Important Before Ordering & Installation

- Avera switches require checking the wiring and number of lighting circuits before installation.
- The IR Remote requires continuous USB power and a suitable line of sight to the appliances.
- Levana i7 compatibility must be checked against the door type, opening direction and current measurements.
- The gas-safety scenario depends on correct linking between the gas detector and valve in Tuya / Smart Life.
